ABOUT THE COMPANY:

We are a family owned foundry group, based in India, and supplying electric motor castings in Czech Republic, Finland, Germany, India, Italy and Mexico. We started out, modestly, in 1967 as a supplier to local diesel engine manufacturers and have now emerged as a 50,000 tons p.a. foundry, supplying castings to world-class engineering companies. Our production process is spread out across three plants, within 7 Km of each other, and we have in-house capacity for casting, machining, palletizing & container loading. Our management philosophy is simple – to make the most of our existing knowledge base and to keep us updated with the best practices followed in our industry.
