Placement Cell Contact Person	Keyur Desai M - 9099040463

ABOUT COMPANY

AERCON The name of our company derives from AUTOCLAVED **AERATED CONCRETE**.

Aercon India, work towards manufacturing the latest building blocks for modern day edifices- Autoclaved Aerated Concrete Blocks, popularly known as AAC Blocks. In India, this is relatively a novel concept as compared to the rest of the world. In terms of usage of the AAC Blocks, we can say that our blocks are increasingly being used for constructing buildings in the most environmental-friendly manner. Yet, these blocks are very light in weight as they contain air to almost 80% of its actual weight. When you think of a city, the next thing that comes to your mind is buildings. Over the years, we have come up with buildings of varying shapes and sizes and we have just got better at it. On one side, we are adapting architectural techniques and tools to construct marvelous buildings, we are also ensuring that the materials we use are of the topmost quality. Now with technology, even the most fundamental bricks and cement have undergone a sea change. The reason is that we have pioneers in this field with vast engineering knowledge and matchless experience to help us make the most marvelous building blocks and other materials.

ON CAMPUS DRIVE BY AERCON INDIA

(Only for MEFGI Students)

Aercon India is a group with a stronghold in Western India and in the construction and realty industry today.

When we say that we are adapting the styles of building homes and sky scrapers that are the most in use in developed and developing countries abroad, can we stay behind in adapting their materials and tools too? Our founders themselves are experts in the field and have plenty of rich experience in manufacturing Autoclaved Aerated Concrete(AAC) Blocks, and supply them to the companies across the country. We are a leading name in producing these trendsetting blocks in Saurashtra-Kutch region in Western India.
