Placement Cell Contact Person	Ms. Poonam Panchamia M - 9099939589

### JOB DESCRIPTION

This position is for technology enthusiasts. We develop on GAE and are python freaks. This position requires fanatic iterative improvement ability - architect a solution, code, research, code more, research more and code some more, rebuild and re architect, you get the drift. We are seeking hard-core-geeks who are interested in seeing their work used by millions of users the world over.

#### 3 things this position is NOT about:

- This is NOT just a job; this is a passionate hobby for the right kind.
- This is NOT a boxed position. Given the right opportunity, you may code, clean, test and recruit in a challenging environment and remain \*wired\* most of the time.
- This is NOT a position for anybody who has worked in 10,000+ people organization for more than 5 years. (No offence to biggies).

# ON CAMPUS DRIVE BY SEARCE

(Only for MEFGI Students)

## 3 things this position IS about:

- Create, Improve and Deliver. Ability to focus on details is important.
- Roles, titles, ego does not matter; Getting things done quicker and better matters the most.
- Are you passionate about building products which are used by millions of users?

## Skills

### ● Technology Stack:

- Language: Python, PHP, Advanced Javascript
- Frameworks: Django, Yii
- Front end: HTML5, CSS3, Backbone.js, Angular.js, Node.js, JQuery, Bootstrap
- Mobility: Android, IOS (preferred - not required)
- Databases: MongoDB, Google Cloud SQL, Graph/NoSQL, Datastore, MySQL, MSSQL
- PaaS, IaaS: AWS, Google App Engine, Google Cloud Services & Google Apps for Business

### ● Tools:

- Project Management: Basecamp, Asana, Pivotal Tracker
- Code Repositories & Version control: Github & Bitbucket
- Bug Tracking: Fogbugz, JIRA
- Continuous Integration: Jenkins, JIRA
- Frontend IDE: Webstorm

### ● General Expectations:

- Comfortable in the shell: you won't be daunted using Linux via the shell
- A self starter: you will have guidance but be expected to hit the ground running and pick up technical projects quickly.
- Methodical: you will be able to apply a systematic approach to your work at every level.
- Analytical: you will possess a logical and structured approach to problem solving.
- Collaborative: you will love to share what you learn.
- Strong communicator: you will be able to coordinate and communicate within your team and with other members of the business. You'll have the ability to explain technical concepts to non-technical people, and show pragmatism in your solutions.
- A passion for technology: you will have personal interest in web technologies and keep up to date with new developments (not necessarily the latest fad).
- Exceptional attention to detail: you will have to build to complex requirements with great precision.
- Don't Repeat Yourself (DRY): Need to know when to apply the DRY principle  
- make every piece modular as much as you feasibly can.
