About the Company

UEPL started as a New R&D laboratory in a small way in the year 1992 with the aim of indigenously developing Phosphine detection devices for Fumigation industry. Right in the beginning, it was planned to extend the technology developed to other gases. Within the next 10 years company has developed a full range of electronic instruments & chemical detector tubes and established as an indigenous manufacturer of these products. Simultaneously company has developed various types of gas sensors which form the heart of all electronic instruments.
